

VEUP

01. We build what we promise.

Refining the model. Focusing the market. Positioning VeUP for its next stage of growth.

The Data That's Driven These Decisions.

3 months
of analysis

200+
hours

12 months
of deal data

We spent the last quarter interrogating everything:

- Internal team interviews
- Senior AWS team feedback
- Customer interviews
- Competitor analysis
- 12 months of deal flow data
- Delivery and retention data.

What the Data Told Us

01

Most Common
Customer
Profile

02

Most Common
Customer
Journey

03

Highest
Retention
Pattern

04

Biggest
Revenue
Opportunity

This becomes the evidence that justifies everything that follows.

The message is clear. Refine, finesse,
zone in on what's worked.

Get rid of what hasn't.

What We're Leaving Behind.

Regions outside the US & Canada.

Focus resources where AWS relationships and customer traction already exist.

Industries without proven demand.

Double down on sectors where we've demonstrated repeatable success.

Saying yes to every project.

Prioritise engagements that create long-term customer value and growth.

The strategy is simple: go deeper where we already win.

Our Revised Ideal Customer Profile.

73 customers. 12 months of deal data.
The answer was clear.

H2 2026

Seed-Series A companies, \$25K–\$50K/month on AWS, in fintech, healthcare, or media. Accessible, winnable, and where we build the credentials that matter. Three customers carry 63% of our book.
That's not a strategy, that's a risk.

By 2027

We move upmarket: Series B and C, \$50K–\$200K/month.

Typical Profiles

H2 2026 – Track 1 is the route

- Tech/SaaS/ISV
- Fintech
- Life Science
- Media, Streaming & Gaming
- 30–100 employees
- \$1M–\$30M raised
- Seed to Series A
- \$3M–\$20M ARR.
- Avg AWS Spend \$25k–\$50k/month.
- Start-up Engaged, SMB, ISV

2027 – Track 2 is the destination

- 50–250 employees
- \$1M–\$30M raised
- Series B to Series C+
- \$20M–\$100M ARR.
- Avg AWS Spend \$50k–\$200k/month
- ISV/SMB/Mid-Market/Enterprise

“The ICP is not companies looking for an AWS partner.
It is CTOs who privately know their internal team
cannot do this on time.”

02. Our Operating Model

The strategy is simple: fund the work, deliver the outcome, create long-term growth.

Fund it. Build it. Sell it. Three entry points.

Phase 01

A way to fund the
first engagement

Phase 02

A way to guarantee
the build

Phase 03

A way to turn the
AWS partnership
into revenue

Fund it. Build it. Sell it. Three entry points.

Phase 01

Ignite | *Cloud Reclaim*

30-day FinOps and AI Readiness onboarding. Aims to find 15-45% in recoverable AWS costs. Unlocks AWS funding where relevant. Bundled AI Readiness Review using the AWS Well-Architected Framework specialist industry pillars.

- ✓ **Deliverable:** a CFO-ready report and a funded SOW.
- ✓ **AWS commercial:** ACE submitted from day one · Ignite is the entry point that generates net new consumption

Phase 02

Build | *Bespoke Engineering*

Scoped, fixed-price engineering engagement. Same senior engineers who scope it build it. Production-ready in 60-90 days. Written guarantee in every contract. Every engagement maps to one specialism - Cloud Foundation, Sovereign AI, or Agentic AI, with a named AWS funding mechanism before work begins.

- ✓ **AWS commercial:** MAP eligible · ACE partner-originated · Drives Bedrock, EC2, and managed services consumption

Build+ | *Engineering In Residence*

Ongoing senior engineering embedded in the customer's codebase, whether VeUP built it or someone else did. Three tiers: MSP (managed infrastructure), PLES Light (part-time senior engineering), PLES (dedicated embedded team). Retained delivery. Predictable consumption growth.

- ✓ **AWS commercial:** PLES and PLES Light eligible · MSP designation applicable · Ongoing consumption baseline

Phase 03

Sell | *AWS Go-to-Market*

Marketplace listing, co-sell activation, and CPPO mechanics in 30 days. We structure private offers, manage ACE co-sell workflows, and build the ISV's next Marketplace products alongside their development roadmap.

- ✓ **AWS commercial:** Marketplace revenue generated · Every opp ACE-registered

Where we go deep

Our Specialisms

Cloud Foundation

Built for what you're actually building.

Production-ready AWS foundations for scaling companies.

FinOps, Cloud Migration, Landing Zone and Governance, Security and Compliance, Infrastructure as Code, DevOps and Observability.

Sovereign AI

AI that never leaves the building.

Private AI for regulated environments.

AI Knowledge & RAG Systems, Predictive ML & Fraud Detection, MLOps & Edge AI.

Agentic AI

Production agents, not another pilot.

Production Bedrock agents delivering measurable business outcomes.

Agentic AI & Enterprise AI Scaling, Content Moderation, Natural Language Data Access.

Where we go deep

Our Industries

Fintech

Core banking migrations,
FinTech AI, PCI/SOC2
compliant architecture,
fraud detection

Life Sciences

HIPAA-compliant AI, EMR
migration, clinical data
platforms, regulated cloud
architecture

Media, Streaming & Gaming

Content moderation,
recommendation engines,
CDN optimisation,
streaming infrastructure

Why The Model Wins

Every programme is designed to remove a barrier to growth.

Together, the programmes create a system where **each engagement naturally leads to the next.**

03. Our Sales Process

Our Ideal Customer Journey

- **First call - the right fit conversation**
An AE establishes whether we can actually help. Right size, right spend, right stage.
If you're not there yet, we'll tell you. If you are, we move fast.
- **Second call – Meet the team**
This isn't a discovery Sprint - it's a commitment-free introduction to the senior team that will run your production AI. You'll leave with two things: an AOP (technical blueprint documenting exactly where you are and where you need to go) and an SOW for the most urgent piece of work. Most firms charge for this. We don't.
- **If they're not optimized - start with Ignite**
If AWS spend optimisation is on the table, we'll onboard you to Ignite first, including a Well-Architected Review specific to your industry and an AI Readiness assessment. We unlock the savings, find the AWS funding programmes, and let those fund the first SOW. By the time we start building, the relationship has cost you nothing and already delivered measurable value. Those are the best relationships.

Our Ideal Customer Journey

Build - the first engagement

Scoped, guaranteed, delivered. Build delivers against that scope with a written guarantee, so the customer's first experience of VeUP as an engineering partner is a project that shipped exactly as promised. Once the first SOW is complete, you choose how the relationship continues, project by project, or through retained services under Build+.

Build+ - if you want us to stay

That initial delivery creates the trust that makes Build+ a natural conversation, the same team, already inside the codebase, no handoff, no context reset. Ongoing engineering in residence or managed services, carrying the work forward without the context loss that comes from starting over.

** Vero Labs hit Build in 91 days with WAR bundled. DocNexus took 86 days.

For Everyone

For ISVs

Programme Pathways

Four routes into the same growth model.

PATHWAY	JOURNEY	BEST FOR
Growth Path	 Ignite >  Build	Companies with AWS spend, no established FinOps practice, and a build priority they haven't been able to fund.
Growth Path+	 Ignite +  Build (MAP Bundle)	Customers who qualify for MAP and have a clear build scope from the outset.
ISV Programme	 Ignite >  Build >  Sell	Software companies looking to activate Marketplace and AWS co-sell.
Full Programme	 Ignite >  Build >  Build+	Companies that want ongoing engineering support and continuity from day one.

Each pathway is designed around the same principle: unlock **funding**, deliver **outcomes**, and create **long-term growth**.

04. What does the 'new us' look like?

Who we are internally

Built different. Staying that way.

VeUP was built by people who had seen what was broken inside large AWS practices: senior promises, junior delivery, hidden layers and change orders after kickoff. We built something deliberately different.

Boutique isn't a phase

We grow by depth, not volume.

Pods, not pyramids

Senior-led, senior-delivered.

The person who scopes it builds it

No handoff. No hidden delivery layer.

Say no earlier

The bigger the pipeline, the more disciplined the focus.

Who we are to customers

A different kind of AWS partner. By design.

- Senior Engineers,
Always

The people who scope the work deliver the work.

- Outcomes, Not Hours

We bill for what ships,
not the time it takes to
ship it.

- No Handoffs

The team that starts
the engagement can stay
to run it.

THE GUARANTEE:

Every engagement comes with **a written guarantee**. If we don't deliver what we scoped, we keep working until we do. No additional charge.

"We build what we promise" isn't a marketing line. It's written into every engagement.

Who we are to AWS

A partner that prioritises outcomes over volume.

94.4%

Delivery Retention

9

NPS score

100+

Customers

40+

People

ADVANCED

Partner

High-Quality Opportunities

We only submit opportunities we believe we can win and deliver.

Low-Risk Delivery

Senior-led execution creates stronger retention and customer outcomes.

Consumption Growth

Ignite, Build, Sell and Marketplace create long-term AWS revenue growth.

We don't grow through volume. We grow through depth, which means every ACE opportunity we submit is one **we intend to win**.

Who we'll be in 5 years

By 2031, VeUP is 100 of the best AWS engineers in North America. And it still doesn't look like the firms we left.

Reputation

Track 1 customers become the reference cases that win Track 2 opportunities.

Capability

Competencies earned.
Credentials proven.
Market position established.

Model

Pods, not pyramids.
Senior-led. Senior-delivered.

Economics

The most profitable boutique AWS partner per head in the market.

The guarantee is still in every contract. Not because we have to. Because that's who we are.

Why a new identity

The business evolved. The brand system didn't.

THE CHALLENGE

-  **Built for a different stage**
The current identity was designed as a visual brand, not a scalable operating system.
-  **The business moved faster than the brand**
Our positioning, programmes and go-to-market strategy evolved significantly over the last 12 months.
-  **Increasing complexity**
The current system creates inconsistency across channels and requires significant design intervention to maintain quality.

WHAT WE NEED NEXT

-  **AI-ready content creation**
A brand designed to work with modern AI workflows from day one.
-  **Self-serve scalability**
A system that empowers teams and partners to create assets without sacrificing quality.
-  **Flexibility and accessibility**
Built to perform across digital, presentations, events, merchandise and future channels.

The objective is to build a **scalable brand system that reflects the partner we're becoming** and supports the next stage of growth.

VEUP Phase 01

Recover 15-45% of your AWS costs

Your budget already exists. Turn AWS savings into AI delivery.

Powered by VeUP Ignite

VEUP Phase 02

Ship AI at scale. Deploy without risk.

Build production AI for regulated environments faster.

Powered by VeUP Build

VEUP Phase 03

Ship AI projects in 90 days.

Built for companies that need AI systems in production, not pilots.

Powered by VeUP Sell

Ignite PHASE 1
Your AWS spend, converted to capital.

Build PHASE 2
Ship AI systems in 90 days.

VEUP ADVANTAGE
One Journey. Three Programs.

PRODUCTION AI
Funded. Shipped. Scaled.

We're the AI delivery specialist for regulated and growth-stage companies, native to the AWS ecosystem.

Built different. Staying that way.

We're backed by a family office with a single goal: be the best quality AWS partner in the market a decade from now. That means we grow deliberately. Senior-led pods, not pyramids. No delivery layer of juniors hidden behind a partner name. The firms we respect most all started with the same founding promise and lost it quietly, not through one bad decision, but through a thousand small optimisations for utilisation. We've structured ownership and growth to make that impossible.

We build what we promise.
